

FROM THE LAW FIRM OF HANSON WIRSIG MATHEOS

THE HWM INSIDER

At the Scene of an Accident

5 things you need to do:

Number 1: Get medical attention. If your injuries are serious, then go to hospital; otherwise, seeing your doctor as soon as you can is important.

Number 2: Get the name and contact information of the driver AND owner of the car that caused the accident. This is IMPORTANT. Get their Driver's license and vehicle plate number.

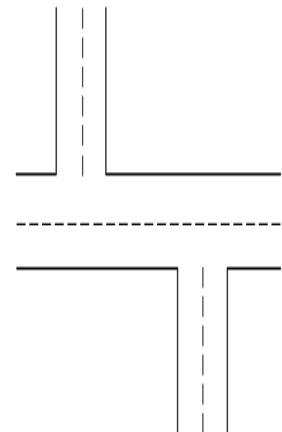

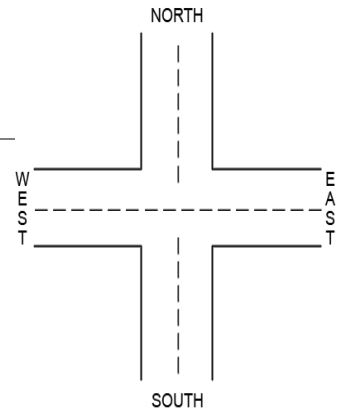

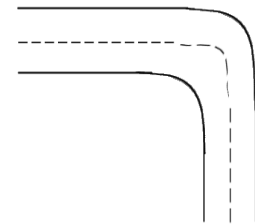

Number 3: If the circumstances of the accident are suspicious or if it is a serious collision, then call the police.

Number 4: Look for any witnesses and take down their name and telephone number. Witnesses can be crucial in determining fault for an accident. And,

Number 5: Call your insurer (whether it is ICBC or some other insurance company) to notify them of the collision. Report the date, location, names of parties involved, and any other relevant information.
